

Abstract of the Disclosure

This invention is directed to an improved method for removing hydrocarbon-containing greases and oils from fabrics. The invention consists of preparing a detergent composition and washing the fabric to be cleaned with the detergent  
5 composition. Broadly, the detergent composition consists of from about 10-50% by weight of a polyalkoxylated amine and from about 90-50% by weight of a water-soluble nonionic surfactant. The invention has desirable foamability characteristics.
